- (ii) any acreage by which a plantation has been reduced shall be deemed not to have formed part of that plantation during the proceeding 8 crop years.

(2) (a) Where the Board is satisfied that the area or yield records of a cane plantation registered by a large planter or growing unit are not adequate or reliable in respect of any one of the normal years, it shall assess the weighted average sugar yield per hectare of that cane plantation by reference to the weighted average sugar yield per hectare for the other normal years for which adequate and reliable area or yield records are available.

(b) Where the Board is satisfied that no adequate and reliable area or yield records are available for a cane plantation in respect of any of the normal years, it shall assess the average sugar yield per hectare which the cane plantation can be expected to yield on such information as it has available.

(3) The Board may, where it is satisfied that the average sugar yield per hectare of a cane plantation in a crop year has been so substantially increased in relation to the most recent normal years as a result of overhead irrigation or the clearance of stones or through common management practices that a determination under subsection (1) will not give the true average sugar yield per hectare of that cane plantation, assess the insurable sugar per hectare of that cane plantation for that crop year by reference to—

- (a) its average sugar yield per hectare in the most recent of the normal years; or
- (b) its weighted average sugar yield per hectare in the 2 most recent of the normal years.

(b) The general insurance premium shall be determined by reference—

- (ii) to the premium percentage set out in the second column of the Second Schedule opposite the ranking assigned to the insured in respect of the crop year for which the premium is payable.

(5) Where a person holds the majority or controlling interest in some plantations registered in the name of 2 or more different planters in the same factory area, any compensation payable in respect of these plantations shall, for the purpose of subsection (1), be assessed as if he were the registered owner of all these plantations and shall be paid to the registered planters in proportion to the harvested acreage of each of these registered plantations.

(6) The Board may deduct, from any money payable to an insured by way of compensation, any sum—

- (a) due to the Board in respect of a general insurance premium payable by the insured; and
- (b) unduly paid by way of compensation to the insured in respect of a previous crop year.

(7) Notwithstanding subsections (1) and (2) and subject to subsection (8), where a cane plantation has been partly or totally destroyed by any cyclone, drought or excessive rainfall, compensation net of premium on the extent destroyed shall be payable in respect of—

(8) For the purpose of subsection (7), the insurable sugar short produced shall be determined by reference to section 22 and shall not be aggregated with the total insurable sugar determined under section 23.

(9) Where the destroyed plantation is under the system of *métayage*, the compensation payable under subsection (7) shall be apportioned between the *métayer* and the owner of the land in the proportion of their respective shares of sugar.

(10) The compensation net of premium on the extent destroyed shall be shared, in respect of cane plantations of a growing unit, among the planters and *métayers* in the growing unit in the proportion of their respective extent destroyed.
